Amphibian graphic:

Across the U.S. nearly 1/2 of our amphibians are threatened or declining. Passage of the Recovering America's Wildlife Act would help us restore habitat for species here in Texas such as the Houston Toad. www.txwildlifealliance.org

Bird graphic:

DYK there are 3 billion fewer birds in our skies than in 1970? Passage of Recovering America's Wildlife Act would help us restore habitats to save declining species such as the Black Skimmer, Eastern Meadowlark, and Bobwhite Quail. www.txwildlifealliance.org #RecoverWildlife

Bees graphic:

More than a 1/4 of our bumblebees are at-risk—essential for pollinating many of our favorite foods and Texas wildflowers. Passage of the Recovering America's Wildlife Act would help restore native plants across the state that will help our pollinators thrive. www.txwildlifealliance.org #RecoverWildlife

Turtle graphic:

Across the country, one-third of our turtle species are declining. Passage of the Recovering America's Wildlife Act would help us take actions needed to help save at-risk turtles in Texas such as the Texas Tortoise and Diamondback Terrapin. www.txwildlifealliance.org #RecoverWildlife

Freshwater Fish graphic:

Passage of the Recovering America's Wildlife Act would help take actions needed, such as reintroductions and riparian habitat restoration, to help our at-risk freshwater fish such as the Guadalupe Bass. www.txwildlifealliance.org #RecoverWildlife
